DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 59-68 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,637,524 alone.

Claims 1-12 describe the claimed invention and the arrangement of at least one of an acoustic transmitter or receiver disposed on a slidable sleeve. However, claims 1-12 do not claim both the acoustic transmitter and receiver disposed on a slidable sleeve and the method of both the acoustic transmitter and receiver disposed on a slidable sleeve to determine a parameter of interest.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the apparatus of claims 1-12 to include both the acoustic sensor with a transmitter and receiver as in disclosed by US 6,637,524, since this

Art Unit: 3671

arrangement was disclosed as being useful for determining properties of a formation by sending and receiving signals.

Claim Objections

3. Claim 64 is objected to because of the following informalities: on line 10 of claim 64, the designation "(c)" is repeated and appears that it should be deleted or replaced with --(d)--. Appropriate correction is required.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
